Model ES92

The ES92 has 3/8" clear tempered glass with round corners and the posts are made with 304 stainless steel. It has a double-sided glass option. This model is available with optional LED lighting which brightens your food on display. ADM Sneezeguards have been manufacturing sneeze guards for over 33 years located in Antioch California. We have a solid reputation and are known thru out the industry as offering a durable and cost-effective product.

Model Features

- Multiple configuration
- Top shelf for display and additional protection
- Operator friendly
- Available with LED lights and food warmers
- Orbit Adjustable brackets (Patented)
- Adjustable self-service Sneezeguards for extended spans for self-service application

Standard Features

- 3/8" Clear tempered glass with polished edges and radius corners.
- Conformance with ASTN C1048-04 and tested to ANSI Z97.1 standard and certified.
- Multiple finishes
- Mounting options

Options

- Brushed stainless Steel
- Powder Coat Black
- Powder Coat RAL _____ colors
- LED lighting

Accessories

- Adjustable Brackets Pairs
- Flange Cover
- Support post PC/SS
- Back horizontal tube
- Under counter compression flange
- Above counter compression flange
- Post clip

All products are manufactured to the highest standards in accordance to NSF and SGCC guidelines. To read more please see our website at www.sneezeguard.com

Please read our Installation and operating manual for safety and installation guidance.

Model ES92

Standard Flange

Flange with Cover

Standard Flange

The standard flange is approx. 2" in diameter and accepts a number 8 course drywall screw. We recommend a 2" long screw for most installations, screws are not included as we do not know what surface type you will be mounting onto so the length of the screw will vary ([see video](#)).

Flange with Cover

Flange covers are designed to fit over existing flanges and hid the mounting screws from view and debris that may fall into screw heads ([see video](#)).

Above Counter Compression

Below Counter Compression

Above Counter Compression

The above counter compression is approx. 2-1/2" wide and accepts a number 8 course drywall screw. Post can be secured down by either a side set screw or via compression bell which uses a wrench to tighten down (wrench included) ([see video](#)).

Below Counter Compression

The below counter compression allows for thru the counter installs and allows for adjustment of post height after install. This flange can not only clamp onto counter but also compress onto post. It can also be reversed mounted so not to void out any solid surface warranty. Speed socket for 3/8" drive ratchet is included ([see video](#)).
